About WCSB

Hosted by the BGRIMM Technology Group (former Beijing General Research Institute of Mining & Metallurgy), the 9th World Conference of Sampling and Blending (WCSB9) will be held in Beijing on May 6-9, 2019.

The conference aims to cover current research and theory in the field of sampling and blending, and share the latest technological knowledge, operational practices and advances in the field. The application areas covered by the conference will include mining, cement, food, feed, pharmaceuticals, agriculture, biology, and environmental protection. The last 8 conferences have been held in Denmark, Australia, Brazil, South Africa, Chile, Peru and France, and now WCSB9 comes to China in 2019.

Why attend

- The conference is the top level international sampling and blending event, sharing the latest knowledge and industry practices;
- Papers will cover a wide range of topics, including minerals, metals & alloys, cement, pharmaceuticals, food, agricultural & biomass products, environmental monitoring, etc;
- Gain valuable knowledge on sampling and blending from respected international experts in the field;
- Expand your sampling and blending contacts and strengthen cooperation on a worldwide basis;
- Improve your personal knowledge through attendance at associated conference workshops;
- Visit the most advanced laboratories in China.

Who should attend

Representatives from Universities and research institutes, mining and trading companies, instrument manufacturers and testing laboratories, regulatory authorities, international quality associations, and government bodies, as well as grade and quality control staff, risk assessors and risk managers.

Theme of the Conference

Smart Sampling & Blending

Main Topics

- Case studies
- Development of national and international standards
- Theory of sampling and blending
- Sampling and blending in various areas, including minerals, metals and alloys, pharmaceuticals, food, feed, agriculture, biomass products, and environmental monitoring
- Quality assurance and quality control (QAQC)
- Metallurgical accounting
- New developments in sampling, sample preparation and blending equipment
- Analytical process technology
- Future technologies

Exhibition Scope

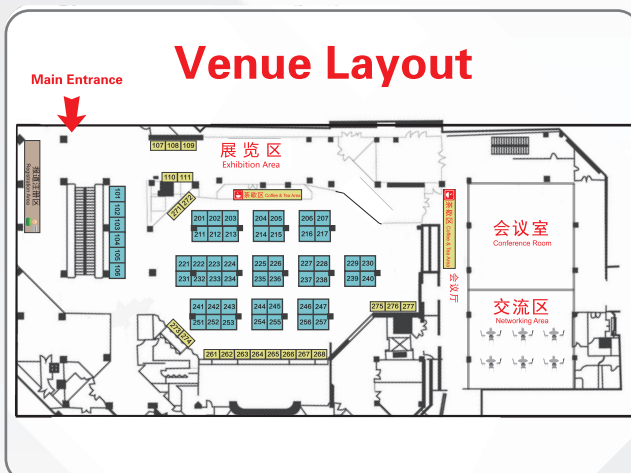

- Sampling, sample preparation and blending equipment
- Automatic online monitoring equipment
- Third party inspection and certification laboratory
- Laboratory analytical instrument and technology
- Testing, measurement and quality controlling
- Mining machinery and equipment
- Environmental sampling and monitoring
- Information consultation & technical service
- Others

Trade Exhibition and Associated Workshops

A trade exhibition will be held at the conference venue, which will provide companies with an excellent opportunity to display their products and services to delegates. A number of pre- and post-conference workshops will also be organized on relevant topics, including sampling theory and practice.

Schedule for Submission of Papers

- Closing date for receipt of abstracts November 9, 2018
- Notification of acceptance of abstracts November 26, 2018
- Receipt of first draft of papers December 21, 2018
